Profile

Android & Flutter developer with 3+ years of experience delivering high-performance apps, optimizing UI navigation by 60%, and building scalable solutions with Firebase, BLE, and Mapbox. Quick learner and excellent collaborator who has worked on software developer teams at NITDA Nigeria and Federal University of Technology Minna.

Education

Sep 2019 – Sep 2025
Minna, Nigeria

Bachelor's in Computer Engineering, Federal University of Technology Minna 
Maintained a high CGPA of 4.31 out of 5.0.

Professional Experience

Jan 2025 – present
Minna, Nigeria

Contributor, Wikimedia Commons 

- Improved ease of navigation between related screens by 60% by optimizing fragment navigation and implementing proper attribute passing.
- Fixed memory leaks and improved app performance by 20% by freeing up references to unused fragments.
- Improved dark mode UI by 4-5% by adjusting system bar colors to match the theme.
- Fixed Gradle build errors by 100% by upgrading obsolete dependencies.

Jul 2024 – Nov 2024
Minna, Nigeria

Freelance Android Developer

- Designed and built 3 full applications using Kotlin and Firebase: A campus navigation app, a lost item tracker app, and an emergency services locator app.
- Built 2 apps featuring dynamic maps and navigation, handling over 20 markers with real-time Firebase updates and offline support using Mapbox, Kotlin, and Firebase.
- Developed seamless app-to-hardware communication by implementing BLE and WiFi connectivity on ESP32.
- Ensured client satisfaction, as measured by excellent reviews and an average rating of 4.9/5, by communicating well and adapting to changing client requirements.

Jun 2024 – Nov 2024
Abuja, Nigeria

Intern, National Information and Technology Development Agency (NITDA) Nigeria 

- Designed and built 2 GUI applications (a YouTube video downloader and a Tic-Tac-Toe game), rigorously tested and vetted by my facilitators with a score of 8/10, using Python and working with a team of fellow interns.
- Designed and built a Hausa language translator, earning a 10/10 score and a recommendation from my supervisor, using Python and Raspberry Pi.

Skills

Android — Java, Kotlin, Android Architecture, MVVM, MVI, Hilt, SQLite, Unit Testing, APIs, Firebase, BLE, Android Profiler
Version Control — Git, GitHub
UI/UX — Responsive Design, Theming, Wireframing, Prototyping
Flutter — Dart, Bloc, Provider, Clean Architecture
Hardware & Communication — BLE, WiFi, Infrared, ESP32, STM32, Raspberry Pi

Projects

Jul 2024 – Nov 2024

Futmaps, Android application
Campus navigation app with 20+ custom markers, turn-by-turn navigation, and real-time Firebase updates. Presented as a final year project with 5+ DAUs at FUT Minna. Built with Kotlin and Jetpack Compose.

Jan 2024 – present

Geobud, Android application 

Geography quiz app with 70+ photo-based questions and data sync. Built with Kotlin and Jetpack Compose.

Jan 2025 – present

Compresso, Flutter application 

Image compression app with 90% compression efficiency. Built with Dart and Provider.
